

# WHY WOULD YOU ENCOURAGE A PEER TO TAKE PART?

---

Key:

**MR:** Manisha Ramlal (university student, Leiden University)

**AS:** Astrid Schouten (teacher, OBS de Voorsprong, The Hague)

**MR:** I am Manisha Ramlal and I study at Leiden University. I work for the project Studenten voor Educatie, where I support the teachers in the classes of group 1 and 2.

**AS:** My name is Astrid Schouten and I have been working at OBS de Voorsprong, a very nice school in the Schilderswijk in The Hague, for 29 years.

**MR:** I find it very valuable to work for this project because I can use my own knowledge in the work and also use the knowledge I gain in the work for my own education.

**AS:** I think it is very valuable that we have the students in the school, we have been doing this project for two years now and all the extra attention the children can get is a great bonus and certainly all the extra help.

**MR:** I would definitely recommend it to other students to get involved in this project, because you can combine it well with your studies, you learn a lot and if you like working with children, I can definitely recommend it.

**AS:** I would definitely recommend it to teachers, it is really nice to have someone in your classroom one moment a week who can give that extra attention to the children who need it.
